AWARDS RECEIVED

🔖 Finalist in the competition for innovation projects in the health area Jaliscup 2020

🔖 Article publication in the National Congress of Biomedical Engineering 2020 titled: "**Tool for Automatic Detection of COVID-19 Lesions in Computed Tomograph**s"

PROJECTS

Portfolio
Personal Projects

https://alejandro-portfolio1.netlify.app
- Static and Dinamic web pages created with HTML, CSS, and JavaScript.

Tool for Automatic Detection of COVID-19 Lesions in Computed Tomographs
National Congress of Biomedical Engineering 2020

http://memorias.somib.org.mx/index.php/memorias/article/view/754
- Tool created in MATLAB that, through an algorithm based on segmentation, automatically detects COVID-19 lesions found in CT scans of the lungs, as well as their visualization in the axial, sagittal and coronal planes, and a 3D reconstruction.

EDUCATIONAL HISTORY

Bachelor of Biomedical Engineering
Universidad de Guadalajara 2016-2021

Full Stack Javascript Web Development Bootcamp
Bedu 2021

LANGUAGE KNOWLEDGE

English - C1

Spanish - Native
